Garden Friends 1

- **Ladybirds:** Many species, each with different colours and markings. Most eat other insects;
- **Bees:** Many species are good pollinators, but only honeybees make honey. Honeybees live in hives, where most workers are females;
- **Spiders:** Not all make webs, but all produce silk. Some jump on prey, others build underground traps;
- **Sardinian warbler (bufulasewda):** A small black, white, and grey bird living in gardens and woodlands;
