Garden Friends 3

- An ant climbing a tree – it needs what the tree provides;
- An ant carrying a seed – the plant depends on ants to bury seeds;
- Ants following each other – sisters helping each other;
- A bird singing – sending messages to other birds;
- A butterfly or bee on a flower – taking nectar while pollinating;
- A beetle among dry leaves – eating leaves to enrich the soil;
- A spider's web – catching insects and keeping balance in nature;
- A bird pecking among leaves – eating insects and cleaning parasites;
- Aphids sucking sap – feeding while becoming part of food chains;
