Start a classroom “Sparrow Diary.” Decide together how to record your observations, it could be a weekly chart like the *Soil Magic Chart*. Create a special symbol for sparrows and add notes or drawings each week. Use imagination to connect sparrows to children’s own lives. Remind them that sparrows are one of our most common birds yet often overlooked despite living so close to us.

Send photos of

- ☐ Sparrow feeding
- ☐ The Sparrow Diary display
- ☐ Children imitating sparrows movements
