Flower Detectives 1

- "Wildflower cards" (Downloadable Material) if no flowers are available in the school grounds;
- Whistle or signal (to call scouts back to the hive);
- At least one extra adult if taking the game outside school grounds.

Children explore perceptions about wild flowers, understand how vital they are for wildlife, and evaluate how flower-friendly their school is.

Flower Detectives 1

1. Divide the class into small groups of “bee scouts.”
 2. Prepare different routes around the school grounds (or nearby streets).
 3. Set the hive: the teacher stays in one place as the hive.
 4. Send scouts out to count flowers (or cards) along their route.
 5. Signal scouts back to the hive (using a whistle or other signal).
 6. Share findings: each group reports how many flowers they found.
 7. Decide as a hive: the whole class chooses the best route with the most flowers.
 8. Repeat (optional) with new routes or to confirm results.
- Variation:** If no flowers are available, place wildflower cards along the routes to simulate foraging.

Children explore perceptions about wild flowers, understand how vital they are for wildlife, and evaluate how flower-friendly their school is.
