Children discover the Blenny fish through observation prompts, videos, and creative activities, learning about coastal habitats and marine life even...

Learning about the Blenny

Keywords **Blenny** • **fish** • **sea** • **observation** • **adaptations** • **creativity**

1. Introduction

Show the video "*Il-Budakkra/The Blenny*" present in the Downloadable Materials section and a sk guiding questions:

“Where do you think Blennies live?”, “What do you notice about their shape and colour?”

Explain that Blennies live in rocky coastlines and rockpools and are experts at hiding in crevices.

2. Indirect Observation

Encourage children to observe:

- Colour patterns;
- Fins and body movement;
- Behaviour in the rockpool (hiding, swimming, feeding).

3. Observation & Recording

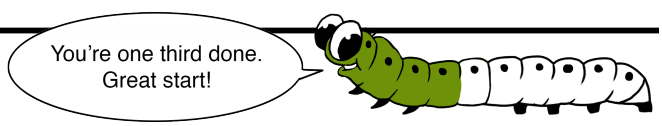

The children should now sketch a Blenny in its habitat or note behaviours they noticed in the video. Start a discussion about adaptations: how the fish hides from predators and survives in shallow, rocky pools.

4. Creative Follow-Up

Children can colour the "*Blenny Postcard*" in the Downloadable Materials using paint, crayons, or natural materials.
