

Bird table menu

Here's a quick look at what to have on the bird table menu, and which bird likes what.

Try other food...

You can experiment with other foods, like legumes (remember to cook them, or else they contain harmful toxins) and rolled oats (sparrows love them).

Don't put out gooey food – it will mess up your bird table and birds probably won't like it anyway.

No-nos!

Don't put out bread. Some birds will eat it but it's not very nutritious food. It will fill their tummy but it won't give them much energy. Chocolate too is not good for birds.

Why do you think three of the birds don't like seeds?

Hint:
Look at their beaks!
