

HOW TO CREATE REELS WITH CAPCUT

on your phone

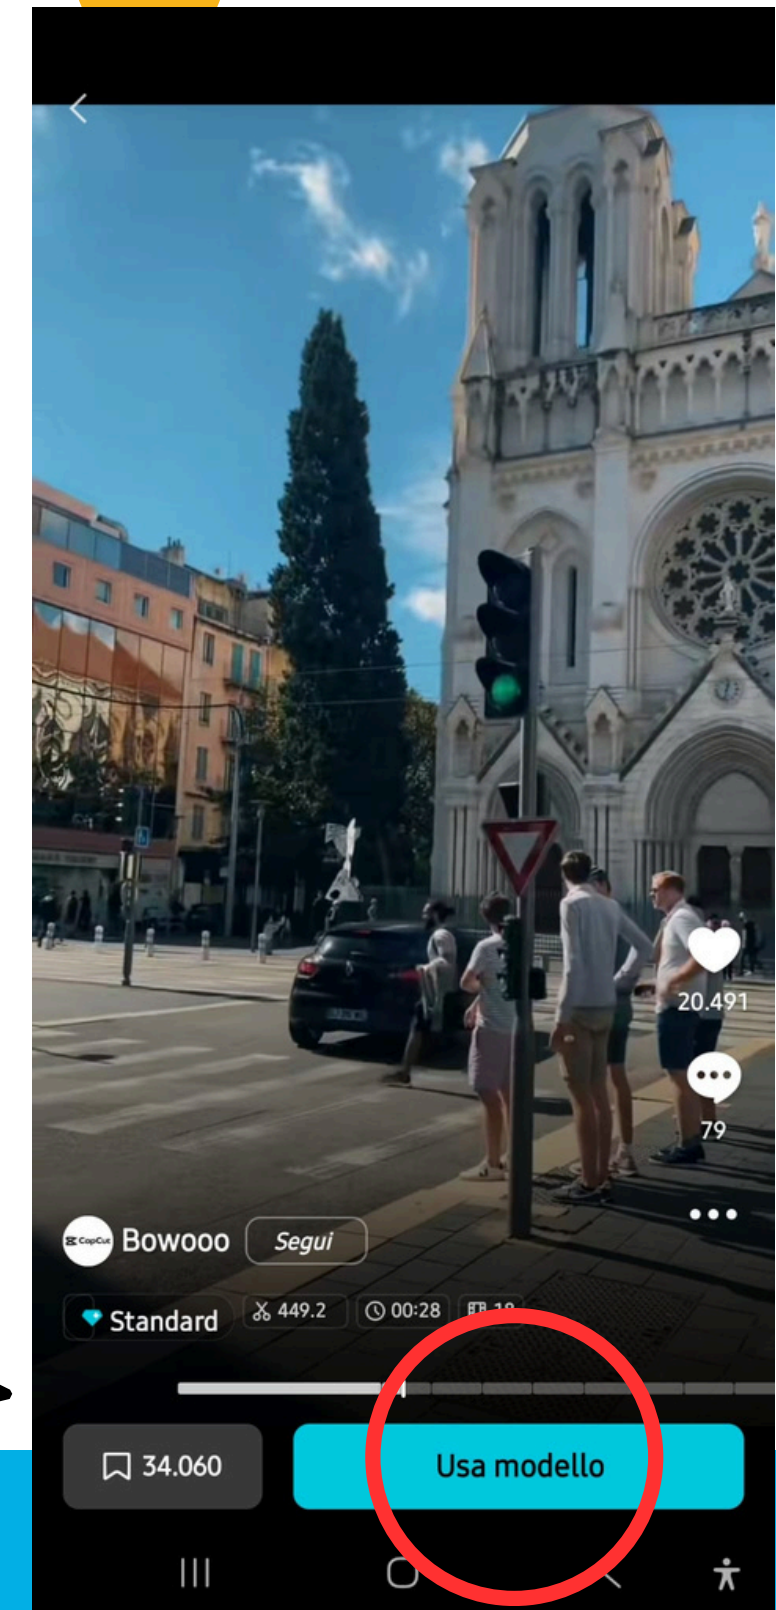

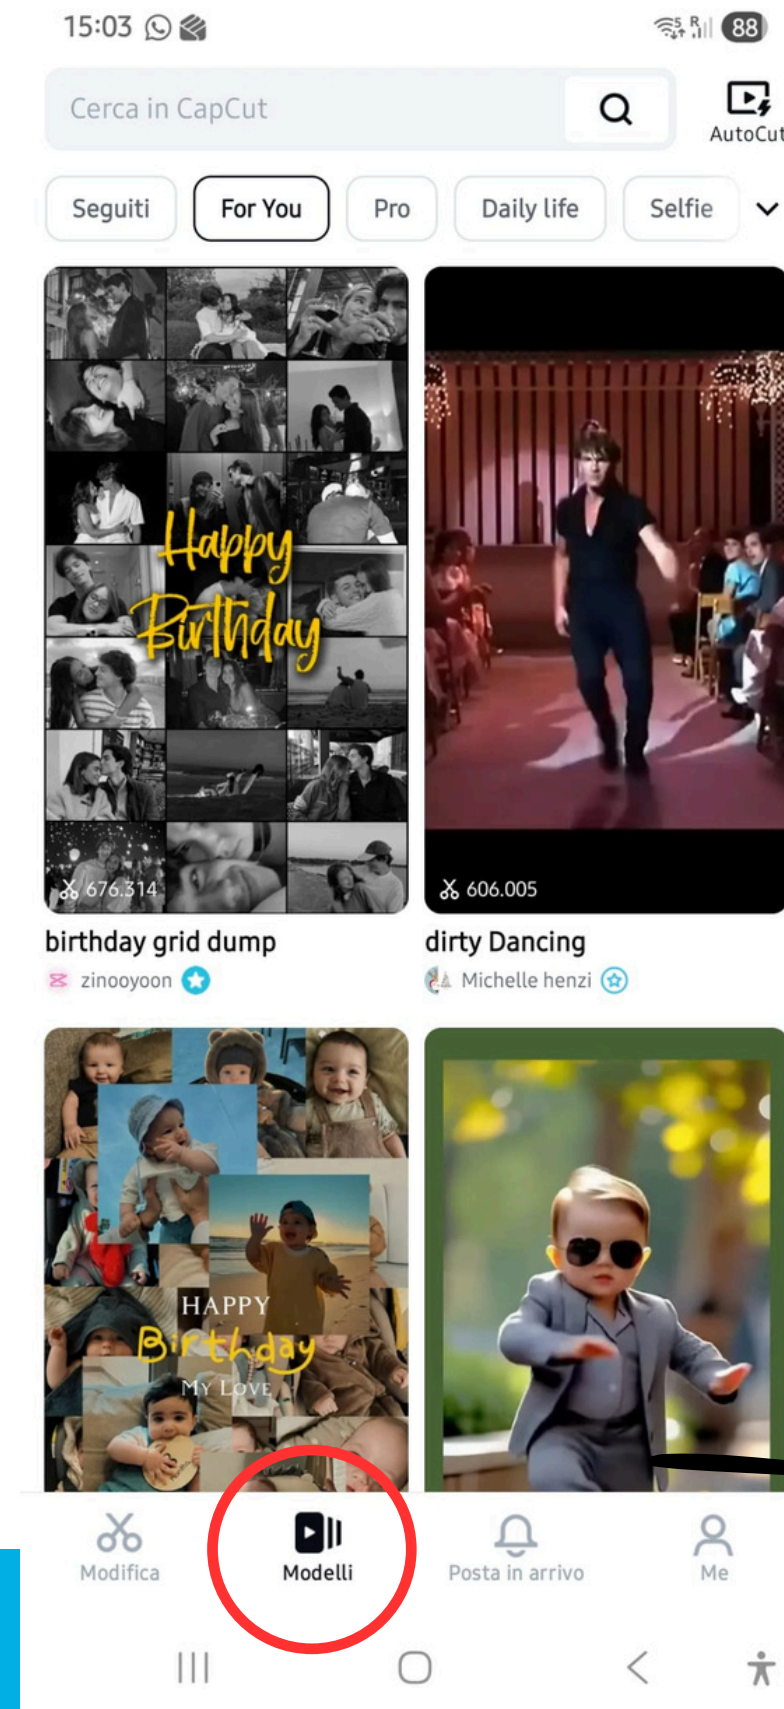

LET'S START...

1. Download CAPCUT from the appstore and open the app on your phone
2. Select NEW VIDEO
3. Select photos/videos to add to your reel

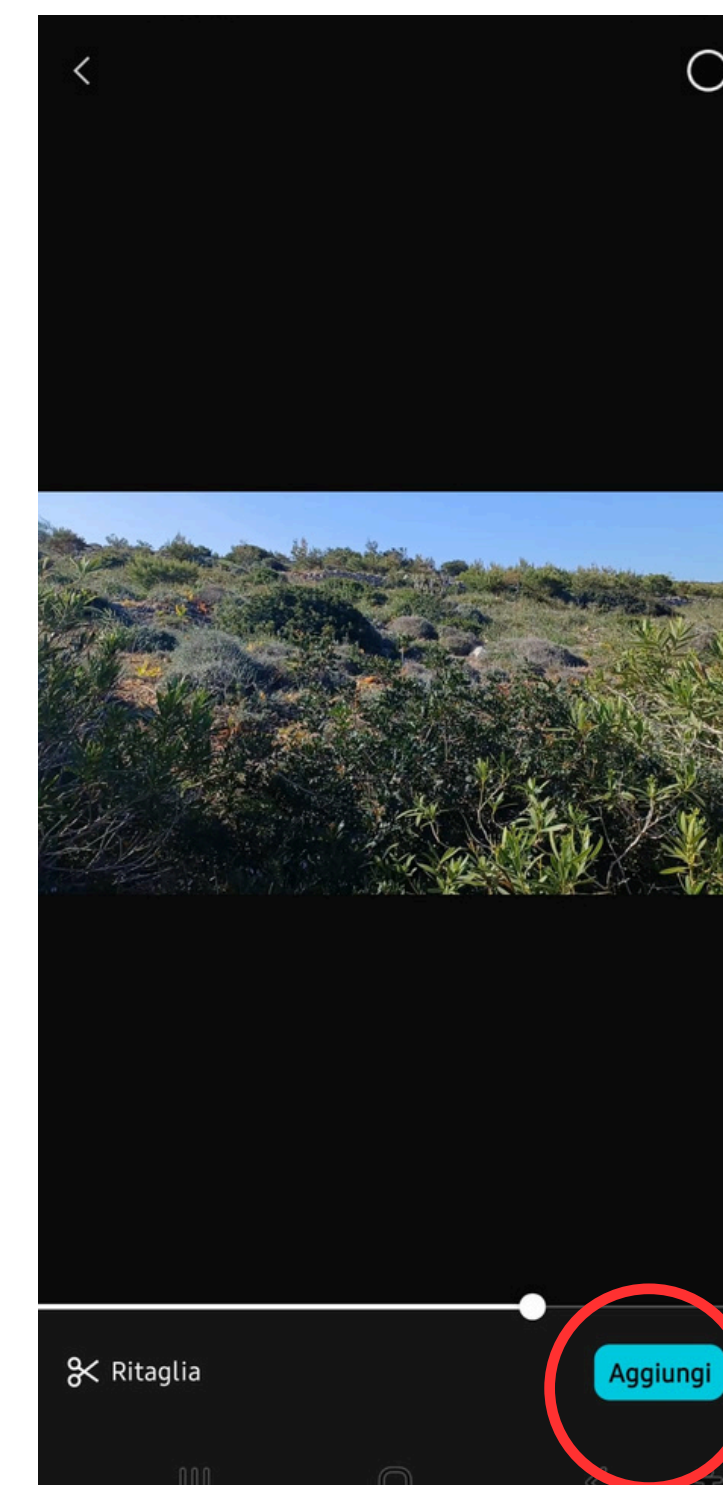

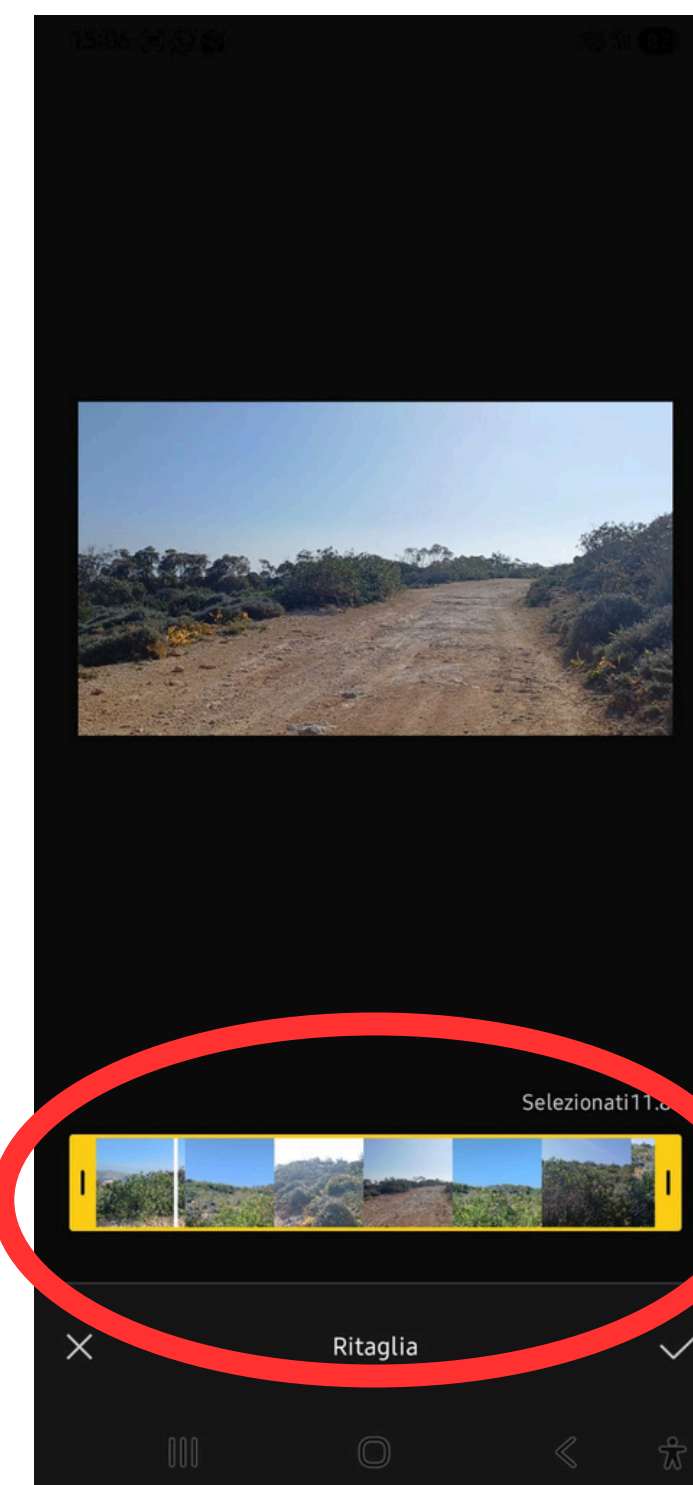

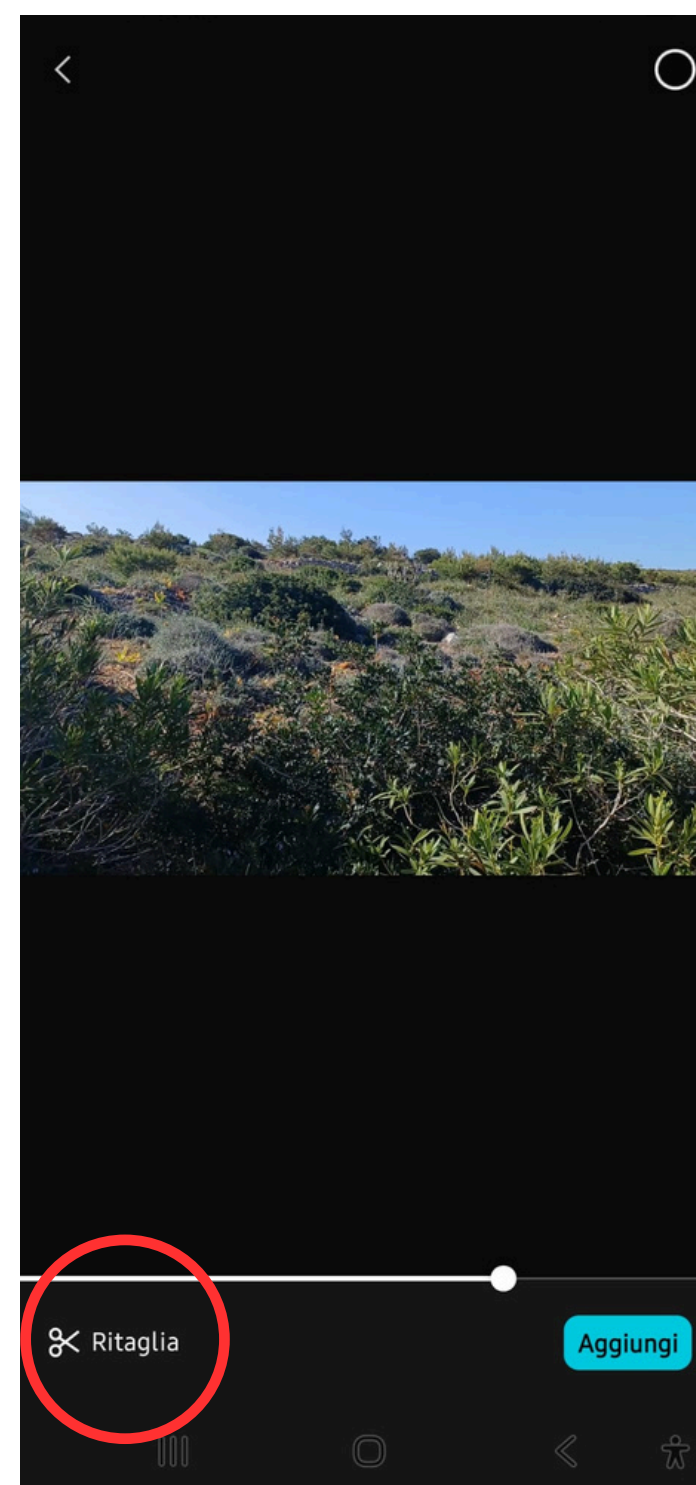

TEMPLATES

4. You can also use a ready-to-use TEMPLATE created by the app by clicking on TEMPLATES
5. Select the template you prefer and then click USE TEMPLATE
6. Add your videos/photos as previously seen

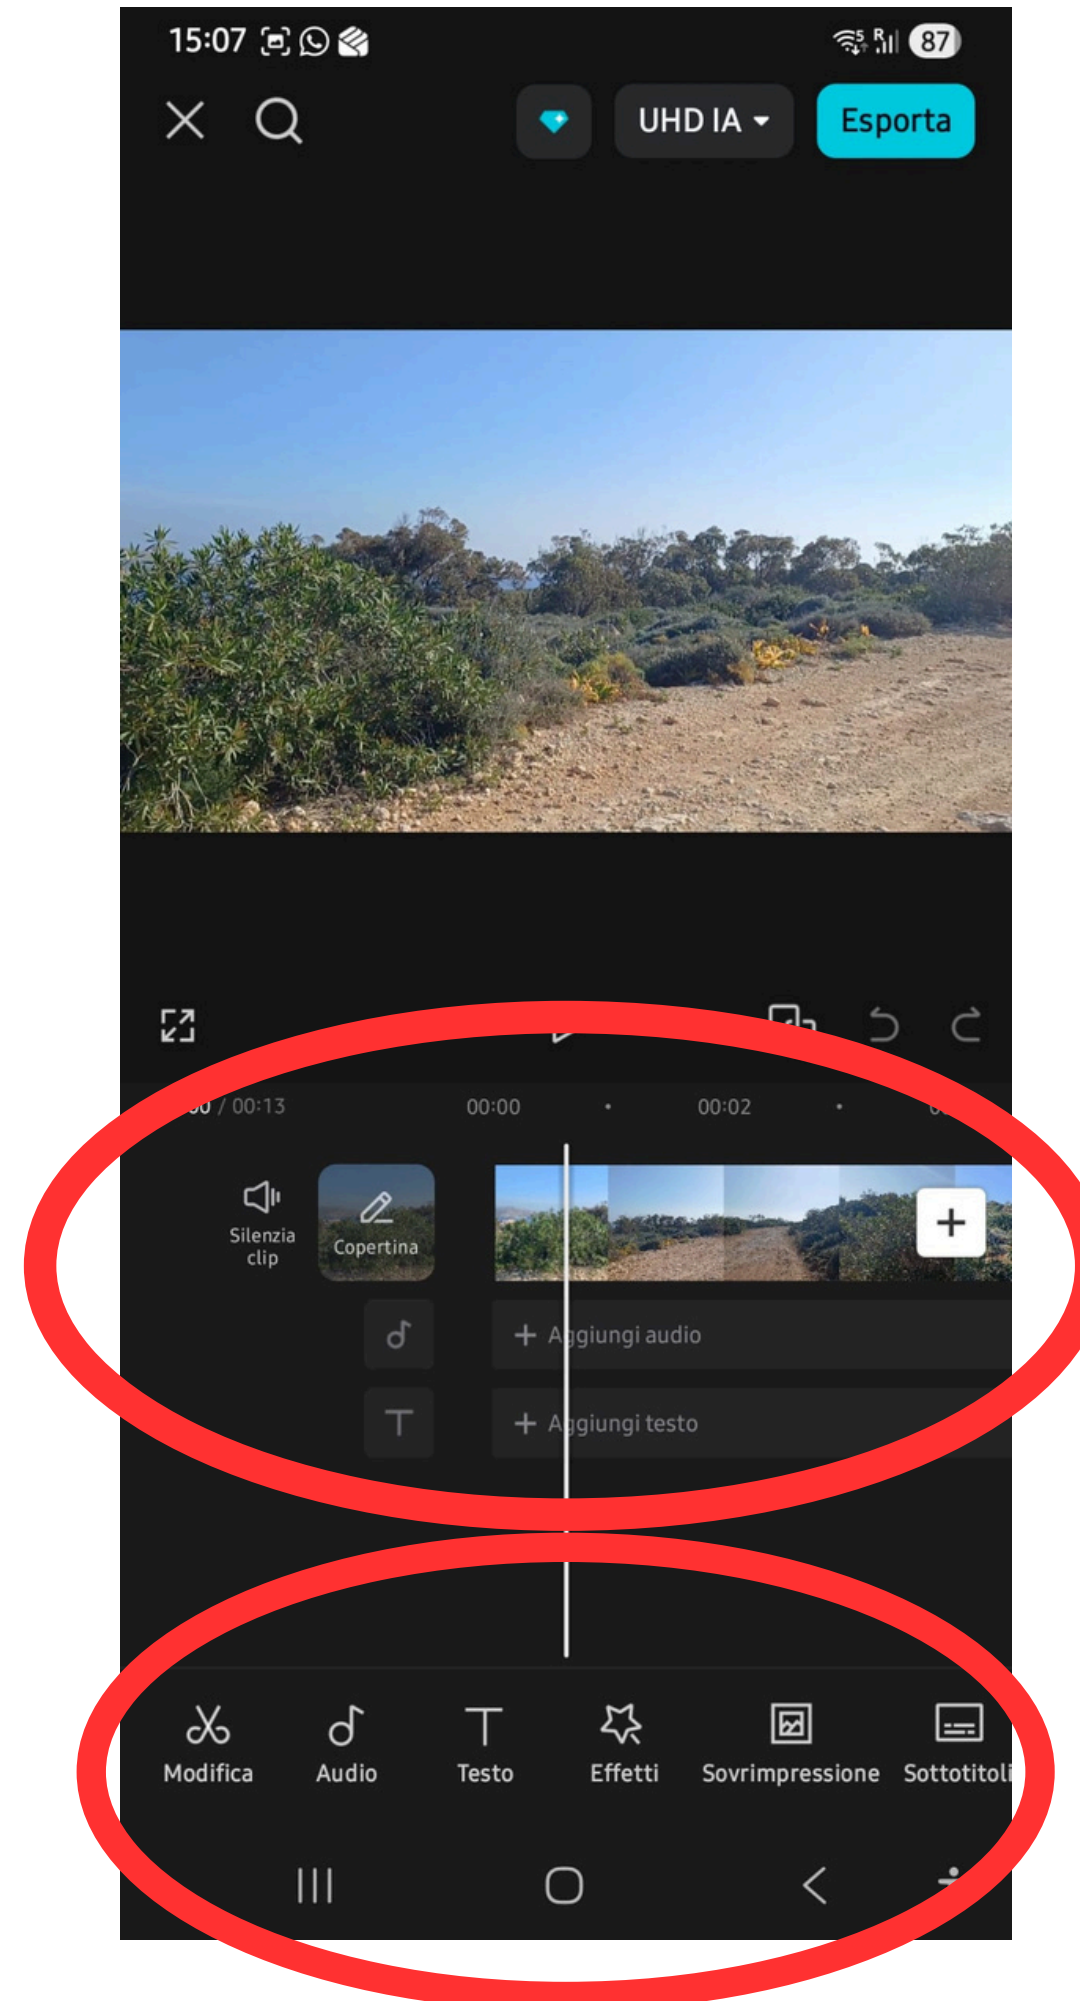

CUTTING

7. After selecting your media, you can cut the video by clicking CUT on the bottom
8. When you are ready, confirm the cut and click on ADD

EDITING

9. Now you can bein editing your reel. On the bottom there are different options to add music, text, effects, filters, subtitles and more
10. You can add elements to specific frames with the tools below the reel

Use your finger to slide through the frames and the different icons

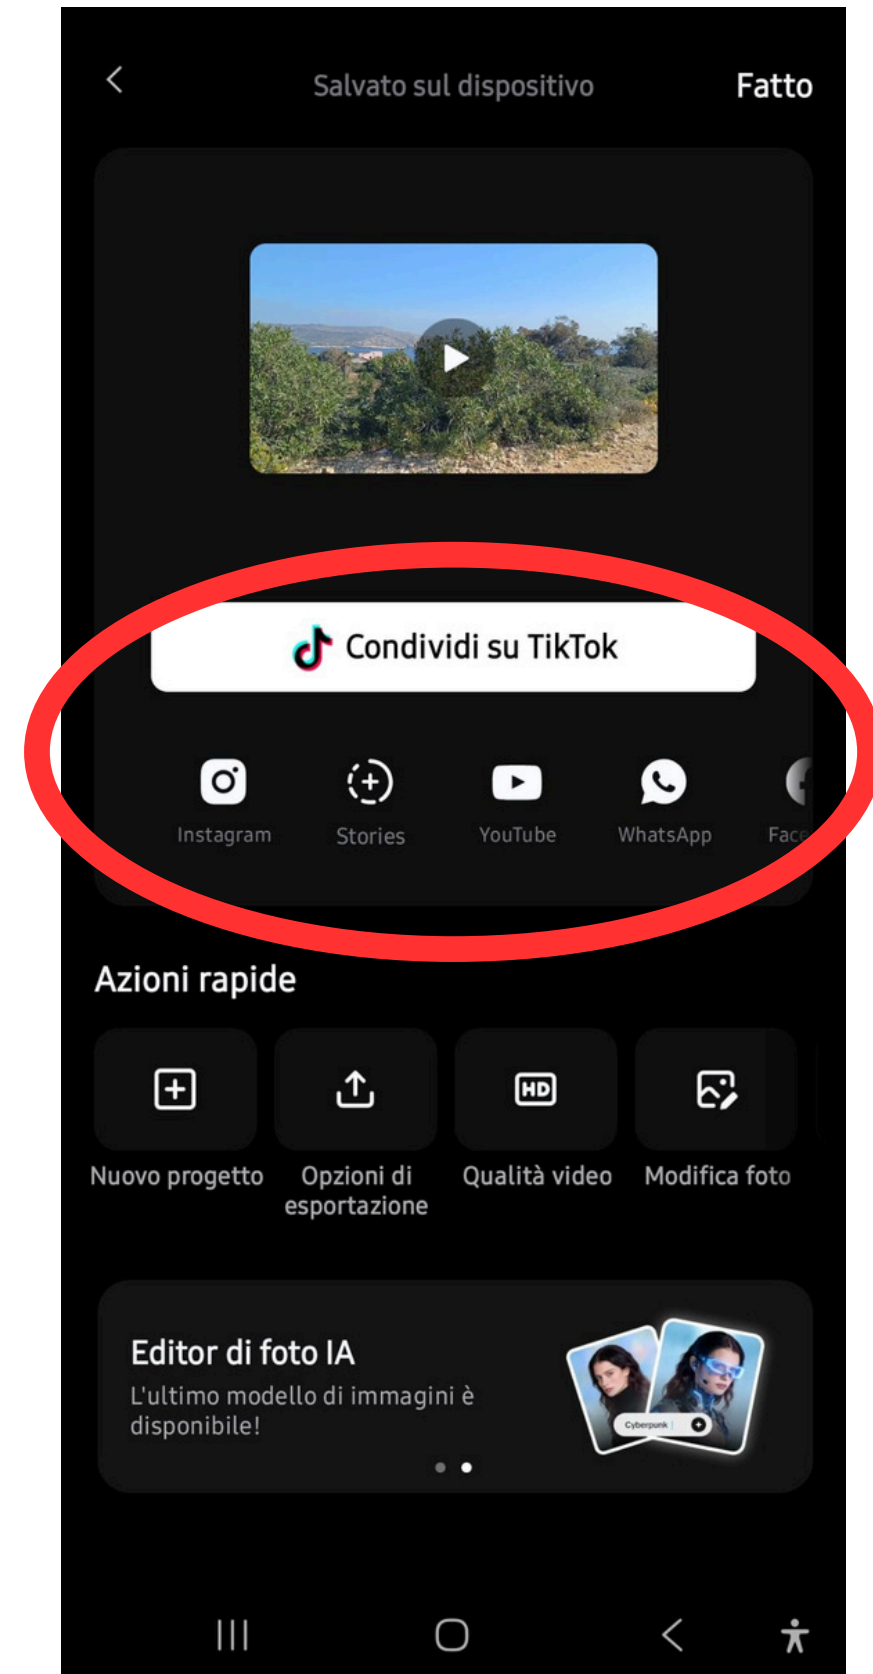

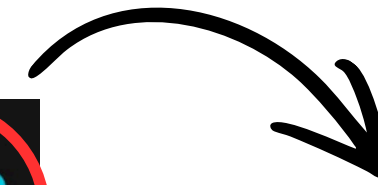

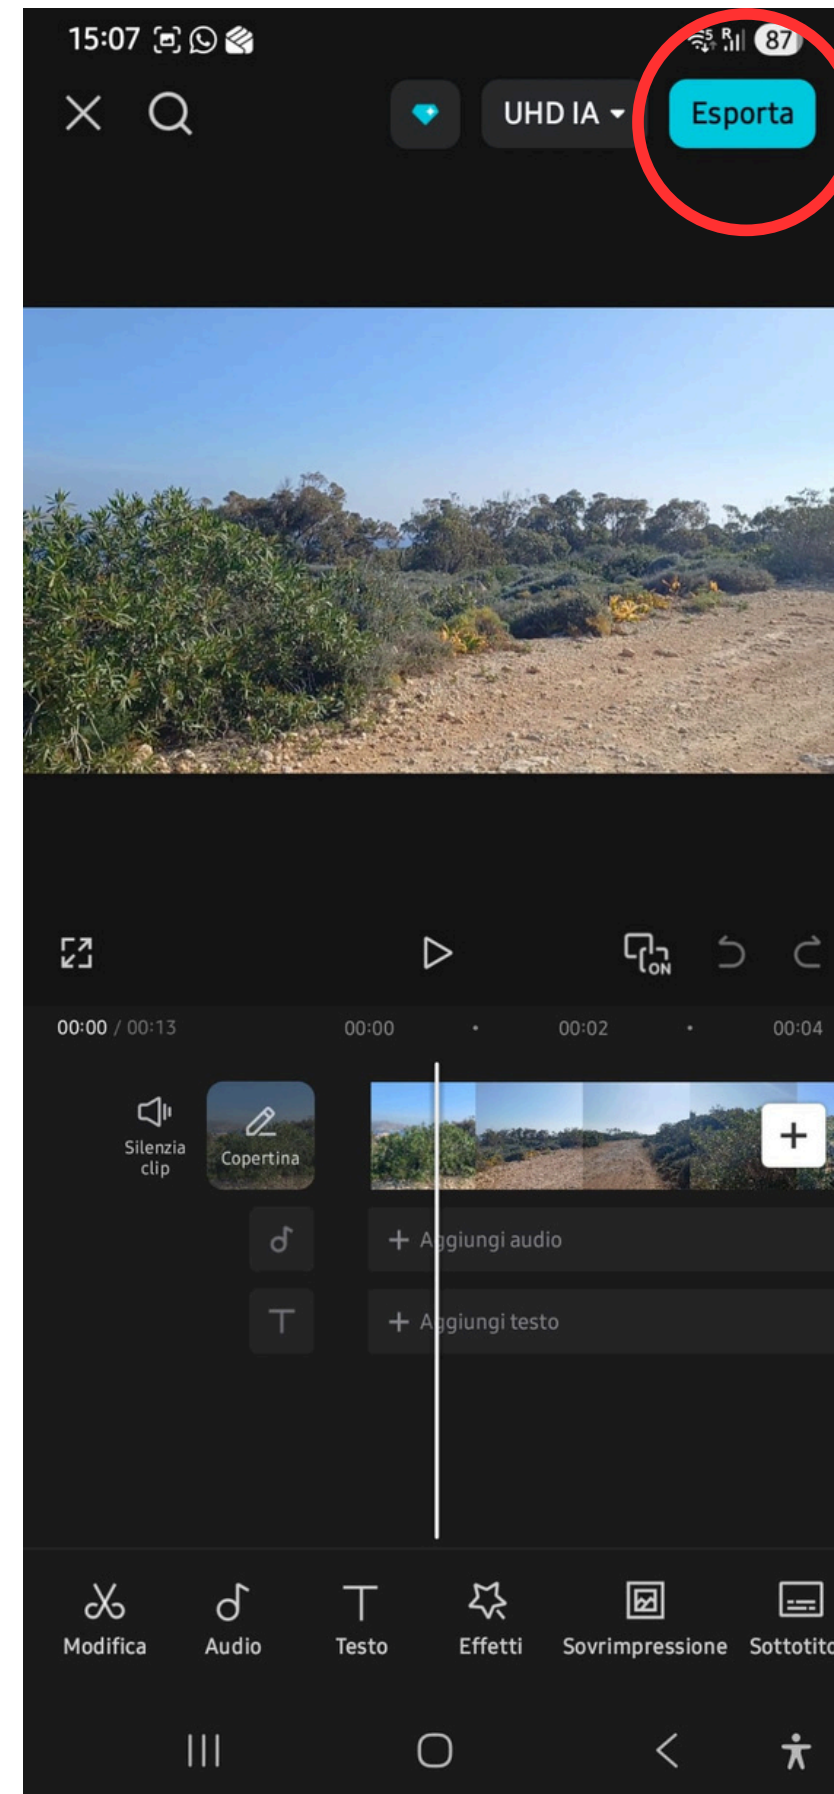

SHARING

9. When the video is ready, click on EXPORT

10. Now the video will be saved on your phone and you can share it on social media

Remember to tag us!

@dinja_wahda

Now you are ready to create and share
your own reel with Capcut from your
phone!

HAVE FUN!
